

Success Story: How Mendocino WTP solved its wipe issue

Meet the **Mendocino WTP** and discover how Screentec, the Pump Station Bar Screen, has **improved their process**.

- **Wipes issues permanently solved** ✓
- **No more manual cleaning** ✓
- **Less than 1K\$ in spare parts for 10 years** ✓

“With Screentec, there is no more debris and wipes in the clarifier”

Mike Kelley - Mendocino Former Superintendent

The Treatment Plant

Opened in January, 1975 for the Mendocino City Community Services District with a treatment capacity of approximately 1 MGD

Before Screentec

-  Bulky grinder to break up debris
-  Unwanted inorganic materials accumulated at various points
-  Manual removal of debris by operators

After Screentec

-  Permanently solved issues with wipe accumulation
-  Less than \$1,000 spent on upkeep for 10 years
-  No more dangerous manual cleaning

Permanent Protection from Clogging Due to Wipes

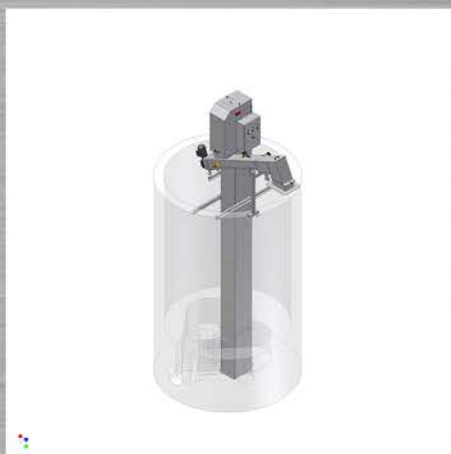

The Challenge: Improving treatment while saving taxpayer money!

-  Stop debris before it reaches the plant or treated water
-  Small budget available for the project
-  Retrofit a unique footprint of 12ft deep headworks with narrow 8ft manhole access.
-  Corrosive environment due to the coastal condition

The Aqualitec Solution: High Quality Pump Station Bar Screen

-  Vertical screen design will retrofit any application
-  Low maintenance: less than \$1K on repairs and parts during 10 years of service
-  High capture rate: Significant drop of solid accumulation
-  Safety: No need to put operators at risk

Screntec will stop, remove, and collect waste material BEFORE they clog the sewer system. Low upkeep, high capture rate, great quality.
